RECYCLING COLLECTION BINS

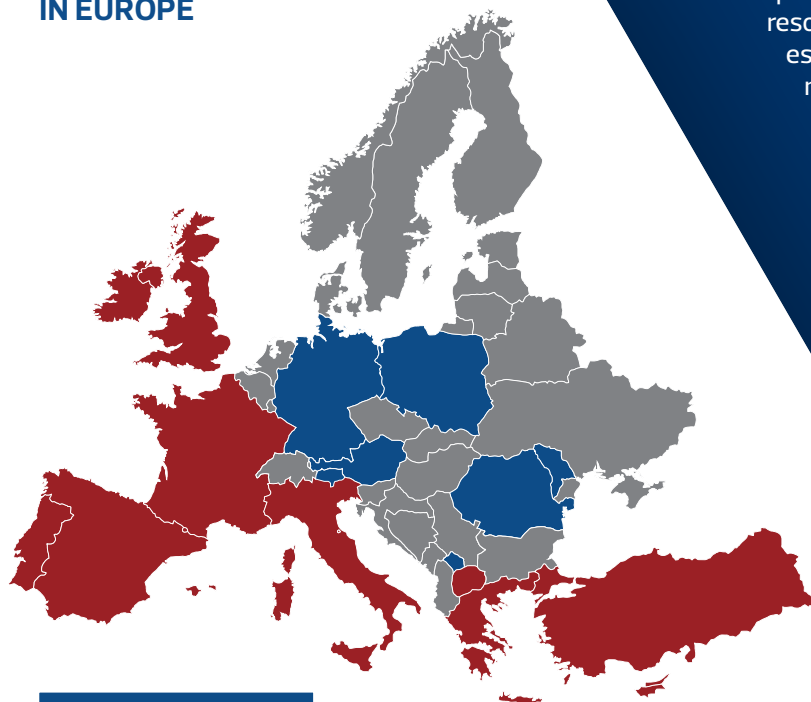

THE FASTEST SOLUTION.

FOR OVER 20 YEARS,
EUROPLAST HAS BEEN ONE
OF THE FRONT RUNNERS IN
THE EUROPEAN PLASTICS
PROCESSING INDUSTRY.

Our speed and flexibility are unique within the industry. A perfectly coordinated team, short distances and reaction times, and the highest level precision in terms of development and execution. Through this, EUROPLAST creates significant added value for its customers.

A pioneer in the development of new, resource-saving production processes has established itself on the international market, thanks to excellent problem-solving expertise and groundbreaking products such as the High-Performance Bin. Patented technology makes handling easier for users in the waste management industry, and extends the life cycle of the products. EUROPLAST combines robust durability with an efficient use of materials and creates new application possibilities for transport and storage.

OUR SERVICE PROMISE

EVERY DAY COUNTS!

Short distances and quick responses are unique customer benefits.

MAKE IT EASY!

Optimised dead weight of the containers for full functionality during their lifespan.

EXPERTISE!

Wide spectrum of specialist knowledge and skills in the fields of material technology, production technology and application technology.

TRUST & EXPERIENCE!

Nature is our most important asset. We deliver as fast as necessary. We know that every day counts. We work as simply as possible. We know that partnership is based on trust and experience.

IN HARMONY WITH NATURE!

A pioneer in the development of new, resource-saving production processes.

TECHNICAL OVERVIEW

Material

- > Raw material **HDPE**
(High-Density Polyethylene)
- > A flexible and impact resistant material

Technical advantages

- > Patented comb bar for reducing comb breakages
- > Max. loading capacity due to beads in the front area

Environmental advantages

- > Energy-efficient production
- > Emission-free production
- > Sustainability and durability

Practical advantages

- > Due to the weight, it comes to a easier handling and protection for the user
- > Temperature and weather resistant
(-25 °C to +40 °C)
- > "Green thinking": careful use of resources and sustainable due to recyclability
- > Optional embossed marking with logo and text as well as numbers
- > Distinction thanks to different colours
- > Accessories such as hooded disposal lids, locks and pedal opening

**1100 L
FLAT LID BIN**

UNIQUE PATENTED
