

PRODUCT INTRODUCTION

THE NEW 16 LITRE BATTERY COLLECTION BOX

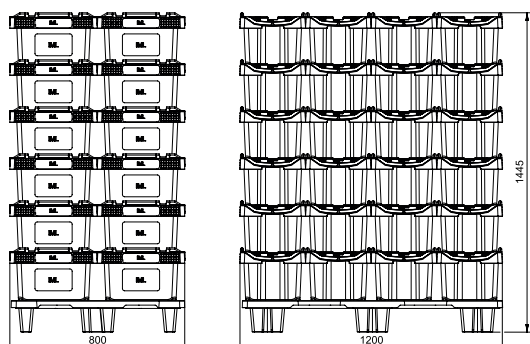

A NEW BENCHMARK IN THE CIRCULAR ECONOMY

The robust battery collection box developed together with customers is a sustainable solution for the collection, transport and storage of used batteries.

Especially in supermarkets consumers have the opportunity to return used batteries. The currently used collection containers are not a satisfactory solution. The box, which can be certified according to ADR, can be used again and again according to the principles of the circular economy. (circulation container).

Space-optimised, convenient stacking on pallets is also possible, as is the use of special insertion openings. The integration of in-mould labels is in the works – can be implemented according to customer requirements. **Once again a clever idea from Europlast!**

APPROVED QUALITY FOR DANGEROUS GOODS

The Carinthian waste disposal specialist Peter Seppele GmbH relies on tested quality for hazardous goods!

Transporting dangerous goods in accordance with regulations and storing them just as safely is a top priority for the Carinthian family business.

The product quality and the rapid availability of the Europlast ADR-tested CTR 3 boxes was convincing. We are particularly pleased about the friendly cooperation and the trust in local products. We have maintained a good partnership for years.

CONTRACT MANUFACTURING

NEXT LEVEL “HYDROGEN TANK-IN LINER”

Europlast has several injection moulding machines that enable the production of particularly large and heavy parts.

This and the high level of automation expertise of our team have contributed to our being allowed to produce a key component for hydrogen tanks in the future. We see the high quality requirements as a challenge that we are happy to meet.

The tanks are completed by our client and sold to manufacturers of various hydrogen-powered vehicles. Among other things, the tanks are to be used in trucks, ships, trains or even construction machinery. We're delighted about the feedback from our client's project manager: "The mould validation was professionally and perfectly supervised by Europlast – it doesn't get any better than that!"

CT/ZP

THE MASTER CLASS IN FRUIT COLLECTION

QUALITY PROVEN MILLIONS
OF TIMES OVER

Increased perforations

Rounded perforation edges

Reinforced supports & side walls

Simplified foot fixation means no more pins visible on the tie bar

Europlast has sold more than 1 million big boxes for the collection and storage of fruit since the beginning of the company's history in 1995. With the new square fruit crate CT/ZP (1120 x 1120 x 770 mm), Europlast will start a new chapter in this success story.

The product has all the features of a modern big box, especially the mounting of the feet by means of a screw connection or the optimised ventilation of the box with enlarged, rounded perforations, which are clear benefits that the product offers. The product is produced in a CO₂-neutral way and contributes to reducing CO₂ emissions in cold storage. Europlast offers attractive exchange concepts for the replacement of old, worn-out fruit boxes and uses the material subsequently processed in its own plant for the production of recyclable collection containers.

DID YOU KNOW THAT...

... EUROPLAST can produce a standard-compliant waste bin from renewable raw materials?

It is generally known that plastic can be produced from renewable raw materials. But can these plastics also meet the high requirements of recyclable material collection containers? Our experiments have shown: Both the requirements of EN 840 and our stringent drop tests can be met without any problems. The mechanical properties

are very good. **For our trials, raw material was used that is based on sugar cane.** Thus, we are ready for its implementation for our customers – according to our motto – In harmony with nature.

THE PEOPLE AT EUROPLAST

THOMAS GALLOB

Born in 1995, lives in Berg im Drautal, 1 child

Hobbies: Football, ski tours, fire brigade

At Europlast since 01.03.2015

I try to give my all in all tasks, both professional and private, otherwise it is a waste of time in my eyes. It's also important for me to laugh a bit at work, but that's not difficult with such nice colleagues.

“ ALONE YOU ARE STRONG,
TOGETHER UNBEATABLE! ”

SOCIAL RESPONSIBILITY

With the end of 2021, EUROPLAST has once again decided to live up to its social responsibility.

We are supporting the archer Lukas Moser from Dellach in his sporting career. The Austrian Archery Champion – is now **“Powered by Europlast!”**

As a sponsor, we congratulate you and look forward to accompanying you on your road to success!
